 Do not allow undiluted product or product that has not been neutralized to reach ground water, water course or sewage system.  
 Harmful to aquatic organisms  
 Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.
