

Drip-Dry: Concentrated Beading Agent - Liquid "WAX"

Description:

Drip-Dry is a highly concentrated liquid "WAX" rinse/drying aid for automated car & truck washes. Aids in quick drying and produces a great luster. Drip-Dry maximizes water beading, without waxy ingredients, on all surfaces allowing the blowers and driers to force water easily off the car. Safe on all surfaces.

Applications: Automatic car washes, tunnel, touch and self-serve.

- ◆ Economical formula
- ◆ Superior beading action
- ◆ Highly concentrated
- ◆ Easy to apply

USE INSTRUCTIONS: DRIP DRY may be metered through a proportioner or diluted in a makeup tank. Concentration on the vehicle should be adjusted to about 1:1500 for most applications. Concentration used depends upon weather conditions, line speed, water conditions, and capacity and placement of air drying equipment.

Typical Usage Parameters:

	Drip Dry
Concentration Range	Use at 500:1 to 1500:1
Operating temperatures	Ambient
Application method	SPRAY
Aluminum/brass/ copper	Safe
Glass / Plastics	Safe
Painted surfaces	Safe
Clear Coat	Safe

Physical Properties:

	Drip Dry
pH, concentrate	7.5
pH, @ 0.1% bv	Depends on your H ₂ O
Bulk Density, #/gal	7.7
Solubility in water	Complete
Color	Light gold – No dyes
Odor	Fresh lemon scent

Availability: 1, 5, 55 and 300-gallon containers.

Warnings: Contains Petroleum distillates. May be harmful if swallowed. Do not ingest. My cause temporary eye irritation. For contact with eyes, flush thoroughly with plenty of water. Wash thoroughly after handling. Consult the material safety data sheet for additional precautions.

Storage: Keep out of direct sunlight. Keep from freezing. Store between 35-100°F.

Disposal: Dispose of in accordance with local, state, and federal regulations.
